

# Subject Index to Volume 27

## A

- A23187: *see* Ionophore A23187
- O-Acetylation, sleep and temperature, bacterial peptidoglycan effects, R182
- Acetylcholine, endothelium-dependent contractions to, estradiol effects, aorta, R1502
- Acetylcholinesterase, inhibitor of, skin blood flow and, R951
- Acid-base balance  
erythropoietin formation, hypoxia, R678  
nonworking muscle, intermittent intense exercise, R1486  
plasma catecholamines and, exercise, R1411  
temperature and, hippocampal population spikes and (hamster), R1140
- Acid-base-electrolyte balance, responses, catecholamine antagonists (salamander), R1363
- Acidemia  
lactic  
blood flow and oxygen consumption during, fetus (lamb), R1116  
oxygen consumption during, fetus (lamb), R1108
- Acidosis  
erythropoietin formation, hypoxia, R678  
respiratory, catecholamines and (salamander), R1363
- ACTH: *see* Adrenocorticotropin
- Actin, mRNA, intestinal bypass effects, ileal smooth muscle, R39
- Adenosine monophosphate, cyclic  
renin secretion and, kidney, fetus (lamb), R388  
response, cystic fibrosis, labial glands, R1320
- Adenylate cyclase, neurohypophysial hormone receptor, gill epithelium (fish), R3
- Adipose tissue  
brown: *see* Brown fat  
white, lipid composition (marmot), R1123
- Adrenal gland  
epinephrine release, angiotensin and low-sodium diet effects, R187  
neuroendocrine response, noise, awake state, R672
- Adrenal cortex, ultradian and oscillations, awake state, R578
- Adrenal medulla  
catecholamine response, hypoxia-direct and neural components, fetus (sheep), R1340  
epinephrine release, angiotensin and low-sodium diet effects, R187
- Adrenalectomy, diazepam effects, cooling preoptic area, R393
- Adrenocorticotropin  
cortisol inhibition of, awake state, R64  
response  
hemorrhage, prolactin response relations (swine), R645  
noise, awake state, R672
- Afferents  
cardiovascular, input, systemic angiotensin effects, R70  
pelvic, urinary bladder input effects, R10  
somatic, noxious somatic stimuli excitation of, R1516
- Aging, antioxidant enzyme alterations, skeletal muscle and liver, R918
- Airway, upper, olfactory receptors, carbon dioxide effects (bullfrog), R1207
- Alcohol, attenuation, endotoxin-enhanced glucose utilization and, R987
- Aldosterone  
blockade: *see* Blockade  
head-out immersion and, quadriplegia, R1424
- Alkalosis, erythropoietin formation, hypoxia, R678
- Amino acids  
facilitated transport, blood-nerve barrier, peripheral nerve, R1436  
free, <sup>31</sup>P-NMR (earthworm), R1132  
 $\gamma$ -Aminobutyric acid  
glucose influence, brain, R697  
response, ventrolateral medulla, spontaneous hypertension, R450
- p-Aminohippuric acid, renal and systemic hemodynamic responses, sustained maximal exertion (horse), R1177
- Aminophylline, metabolic effects, weanlings, R193
- Analysis of variance, two-way, missing data in, R291
- Anaphylaxis, hypotension, renal nerve activity effects, R383
- Anemia  
functional, erythropoietin effects, acidosis and, R678  
hematocrit effects, behavioral thermoregulation (toad), R848  
renin response to hemorrhage, awake state, R487
- Anesthesia, pentobarbital, renal action of ANP, R616
- Anestrus, starvation-induced, metabolic fuel and estrous cycle (hamster), R750
- ANF: *see* Atrial natriuretic factor
- Angiotensin  
blockade: *see* Blockade  
central effects of, streptozotocin treatment, awake state, R1147  
epinephrine release and, low-sodium diet, R187  
systemic effects, area postrema neurons, R70
- Angiotensin-converting enzyme  
kallikrein-kinin system (trout), R501  
metabolism, kinin vascular effects, gill (trout), R515
- Angiotensin II  
baroreflex control of sympathetic outflow, pregnancy, R1417  
binding sites, aortic endothelium (chicken), R777  
hemodynamic and behavioral effects, awake state (sheep), R1230  
mediation, food-related drinking, R436  
opioids in, acute hemorrhage, awake state, R543  
prostaglandin E<sub>2</sub>-induced increase in sodium and, proximal tubules, R82  
response, area postrema, R1472  
streptozotocin treatment and, R852
- Anorexia, estradiol actions, dexfenfluramine and, ovariectomy, R211
- Anoxia  
cytochrome-c oxidase synthesis and (shrimp), embryo, R1184  
electrical activity and pH during, brain (rat, turtle), R205  
tolerance, serotonin turnover and, brain (carp), R1308
- ANP: *see* Atrial natriuretic peptide
- Antidiuresis  
hypothalamic osmoregulation, female, R924  
vasopressin receptor-effector pathway, renal physiological evaluation, R763
- Antidiuretic hormone: *see also* Vasopressin  
cortisol inhibition of, awake state, R64  
urea transport, salt acclimation and, bladder (toad), R883
- Antioxidant enzymes, aging effects, skeletal muscle and liver, R918
- Antipyresis, endogenous, vasopressin and endotoxin tolerance, R443
- Antipyretics  
against tumor necrosis factor, lipopolysaccharide fever and, R332  
antiserum against tumor necrosis factor, stress hyperthermia, R591  
fever and interleukin 6, R798
- Aorta  
endothelium, angiotensin II binding sites (chicken), R777  
endothelium-dependent contractions to arachidonic acid, estradiol effects, R1502
- Aortic nerve  
baroreceptor denervation, diving response (duck), R895  
naloxone cardiovascular effects, R325
- Arachidonic acid, endothelium-dependent contractions to, estradiol effects, aorta, R1502
- Area postrema  
arterial pressure after hemorrhage, R1472  
efferent pathways, metabolic activation, R788  
vagal sensory neurons, lipoprivic feeding and, R1395
- Arterioles, terminal microvasculature, atrial peptide effects (hamster), R1224
- Ascorbic acid, absorption and metabolism, intestine (trout), R1238
- Atherosclerosis, diabetes and, association of DOCA hypertension, R1042
- Atrial natriuretic factor  
atrial appendectomy effects, acute vasopressin hypertension, R77  
AVP and urine flow response relations, hypertonic infusions, fetus (sheep), R469  
density of C receptors for, dehydration effects, glomerular membranes, R1084  
exaggerated natriuresis, renal interstitial hydrostatic pressure and, hypertension, R1380  
head-out immersion and, quadriplegia, R1424

- Atrial natriuretic factor** (*continued*)  
 hemodynamic, renal, and endocrine actions, infusion type and (sheep), R1279  
 influences, autonomic control of heart rate, R718  
 natriuresis of, dissociation of renal interstitial hydrostatic pressure and, R481  
 sodium excretion, compensated heart failure, R232
- Atrial natriuretic peptide**  
 arterioles and, terminal microvasculature (hamster), R1224  
 central administration, sympathetic outflow and, R1250  
 distribution, receptors subtypes, brain, R1078  
 enhanced, angiotensin and aldosterone blockade, R1101  
 hematocrit and, volume expansion, immaturity and, R729  
 natriuretic response to, renal interstitial hydrostatic pressure effects, R1333  
 receptors: *see* Receptors  
 regulation, central nervous system, R531  
 release  
   cardiopulmonary denervation, R704  
   hydrochloric acid injury, lung, R690  
   renal actions, pentobarbital anesthesia effects, R616  
   renal effects, elasmobranch (dogfish), R1201  
   sustained natriuresis and, awake state, R1445
- Atria: see** Heart atria
- Atriopeptin**  
 central administration, sympathetic outflow and, R1250  
 enhanced, angiotensin and aldosterone blockade, R1101  
 renal actions, pentobarbital anesthesia effects, R616  
 renal effects, elasmobranch (dogfish), R1201
- Atropine**, cardiovascular actions of, after sinoaortic denervation, R596
- Autonomic nervous system**, insulin and glucose variation effects, awake state, R624
- Autoradiography**, area postrema pathways, metabolism of, R788
- Awake state**  
 acute hemorrhage, renin-angiotensin system and opioids, R543  
 ANP, sustained natriuresis and, R1445  
 baroreflex modulation, insulin and glucose variation, R624  
 cardiac baroreceptor reflexes, vasopressin augmentation of, R860  
 CSF pressure, prostaglandin E<sub>1</sub> fever, R783  
 endothelin-2 and sarafotoxin S6b, regional hemodynamic effects, R912  
 feedback inhibition, vasopressin and ACTH responses, R64  
 hemodynamic responses, leukotriene receptor, R1034  
 hemorrhage, renin response to, R487  
 intracranial hypertension, CSF pressure, awake state, R1170  
 neuroendocrine response, noise, R672  
 neuromedin U and hemodynamics, R32

## B

- Bacitracin**, gastrointestinal flora, body temperature effects, R552

- Behavior**, angiotensin II effects, awake state (sheep), R1230
- Betaine**, counteracting effects of urea, mammalian cells, R198
- Bicarbonate**, cell volume modulated by (teleost), R1022
- Bicuculine**, response, ventrolateral medulla, spontaneous hypertension, R450
- Biological clock**, ocular proteins and (*Aplysia*), R256
- Biomechanics**, spaceflight effects, vertebrates, R1327
- Bladder: see** Urinary bladder
- Blockade**  
 angiotensin and aldosterone, enhanced atrial peptide natriuresis during, R1101  
 ganglion, streptozotocin treatment and, R852
- Blood**  
 constituents: *see* specific constituent  
 metabolites, exercise effects, nonworking muscle, R1486
- Blood flow: see also** Circulation;  
 Microcirculation
- adrenal**  
 noise effects, awake state, R672  
 oscillations, awake state, R578  
 CSF production and, vasopressin effects, R94  
 gastric, calcitonin gene-related peptides and, R425
- leg**  
 heat-induced vasodilation during dehydration (baboon), R318  
 hyperosmolality and diuretic effects (baboon), R309  
 neurohypophyseal, catecholamine regulation of (sheep), R1242
- regional**  
 endothelin-2 and sarafotoxin effects, awake state, R912  
 neuromedin U effects, awake state, R32  
 sustained hypoxemia, fetus (lamb), R1116
- renal**  
 calcitonin gene-related peptides and, R425  
 individual glomeruli (snake), R1313  
 leukotriene receptors and, awake state, R1034  
 sustained maximal exertion (horse), R1177  
 skin, acetylcholinesterase inhibitor and, R951  
 umbilical, sustained hypoxemia with acidemia, fetus (lamb), R1108
- Blood-nerve barrier**, peripheral nerve, L-phenylalanine transport, R1436
- Blood pressure: see also** Pressure  
 adrenergic vasoconstriction, neuropeptide and norepinephrine effects, R736  
 angiotensin II effects, awake state (sheep), R1230  
 angiotensins, streptozotocin treatment and, awake state, R1147  
 ANP and sustained natriuresis, awake state, R1445  
 ANP central administration, sympathetic outflow and, R1250  
 arterial, diving responses (duck), R895  
 central opioid modulation, fetus, R1453  
 CNS regulation, plasma ANP, R531  
 control, renin-angiotensin system and opioids during hemorrhage, awake state, R543  
 enhance ANP natriuresis, angiotensin and aldosterone blockade, R1101  
 fasting effects, enhanced response to epinephrine, R87  
 generation of vasoactive substances, plasma (trout), R507  
 prostaglandin E<sub>1</sub> fever, CSF pressure, awake state, R783  
 recording, improved method (monkey), R1512  
 regulation  
   area postrema pathways, R788  
   kallikrein-kinin system (trout), R501  
   renin response to hemorrhage, awake state, R487  
   streptozotocin treatment and, R852  
   TRH infusions and, dorsal raphe nucleus, R1464  
   vascular effects of kinins, bradykinin metabolism, gill (trout), R515  
   vasopressinergic augmentation, awake state, R860  
   vasopressin release, parabrachial nucleus modulation of, R358
- Blood volume: see** Volume
- Body**  
 composition, varying meal patterns and, females, R124  
 weight: *see* Weight
- Bombesin**, inhibition of chloride secretion, somatostatin effects, rectal gland (dogfish), R1459
- Bone**, biomechanics, spaceflight effects, R1327
- Bradycardia**, diving response (duck), R895
- Bradykinin**  
 kallikrein-kinin system (trout), R501  
 metabolism, kinin vascular effects, gill (trout), R515
- Brain**  
 angiotensin II receptors, sodium or chloride depletion effects, R1008  
 cooling, facial vessel role in (camel), R602  
 glucoprivation and ketoprivation, ingestion and, suckling, R365  
 receptor subtypes, ANP distribution, R1078  
 regulation, plasma ANP, R531  
 serotonin turnover, anoxia tolerance and (carp), R1308
- Brain stem**  
 cytoarchitecture, periventricular neurons in hypothalamus (duck), R973  
 prostaglandin synthesis inhibition, muscle reflexes and, fetus (lamb), R1213
- Breathing: see** Respiration
- Bromocriptine**, lactation-induced changes and, brown fat, R51
- Brown fat**  
 adrenergic effects on thyroxine deiodinase, obesity, R430  
 composition, weight gain and, high-fat diet, R608  
 cytochrome oxidase capacity, cold acclimation and (gerbil), R1291  
 lactation-induced changes, prolactin role in, R51  
 uncoupling protein in, regulation by insulin, R418
- Bypass**  
 intestinal  
   actin mRNA with, ileal smooth muscle, R39

feeding, dietary preference, weight gain with, R269

## C

- Cachectin, antiserum against tumor necrosis factor, stress hyperthermia, R591
- Calcium  
cell volume regulation and, erythrocytes (skate), R1217  
stannocalcin synthesis, corpuscles of Stannius (trout), R1157
- Calcium channel, agonists and antagonists, sugar transport and, skeletal muscle, R462
- cAMP: *see* Adenosine monophosphate, cyclic
- Canrenoate, enhanced, angiotensin and aldosterone blockade, R1101
- Capacity, peripheral exchange, atrial peptide effects (hamster), R1224
- Captopril  
baroreflex control of sympathetic outflow, pregnancy, R1417  
food-related drinking, angiotensin II and, R436
- Carbohydrates  
cold exposure, glycolysis regulation of, muscle (bird), R711  
metabolism, cardiac isomyosin and, R346
- Carbon dioxide  
acid-base status and temperature effects, hippocampal population spikes and (hamster), R1140  
electrical activity and pH during, brain (rat, turtle), R205  
olfactory receptors and (bullfrog), R1207  
stimulation of hydrogen ion secretion, urinary bladder (turtle), R222
- 6-Carboxyfluorescein, stimulation of hydrogen ion secretion, urinary bladder (turtle), R222
- Cardiac output  
angiotensin II effects, awake state (sheep), R1230  
closure of uterine circulation and, pregnancy, R1431  
leukotriene receptors and, awake state, R1034  
neuromedin U effects, awake state, R32  
vasopressinergic augmentation, awake state, R860
- Carnitine palmitoyltransferase, oxidation, mitochondrial and peroxisomal, elasmobranchs (fish), R756
- Catecholamine antagonists, acid-base-electrolyte balance response to (salamander), R1363
- Catecholamines  
acid-base status and, exercise, R1411  
adrenal medullary response, hypoxia-direct and neural components, fetus (sheep), R1340  
carotid and sinoaortic denervation, baroreceptor denervation (baboon), R930  
neuroendocrine response, noise, awake state, R672  
regulation, median eminence blood flow (sheep), R1242  
release, angiotensin effects, low-sodium diet, R187  
response, hemorrhage (swine), R645
- Caudal ventrolateral medulla, relay of baroreceptor activation, inhibition of rostral ventrolateral medulla, R1271

- Central nervous system  
angiotensins, streptozotocin treatment and, awake state, R1147  
ANP administration, sympathetic outflow and, R1250  
cardiovascular actions of CRF, after sinoaortic denervation, R596  
cardiovascular regulation, naloxone effects, R325  
CCK injection, feeding effects on gastric emptying, R1165  
gastric satiety signals and (sheep), R947  
intracranial hypertension, CSF pressure, awake state, R1170  
opioid modulation, cardiovascular function and, fetus, R1453  
receptor subtypes, ANP distribution, R1078  
regulation, plasma ANP, R531
- Cerebrospinal fluid  
pressure: *see* Pressure  
production, vasopressin effects, choroid plexus, R94  
prostaglandin fever and, awake state, R783  
thyroxine transport, choroid plexus, R338
- cGMP: *see* Guanosine monophosphate, cyclic
- Chemospecificity, oral, taste detection, R820
- Chloride  
absorption, diluting segment in kidney (shark), R398  
depletion, differential effects, angiotensin II receptors, R1008  
secretion, bombesin inhibition of, somatostatin effects, rectal gland (dogfish), R1459  
transport, catecholamine antagonists and (salamander), R1363
- Chloride-bicarbonate antiport, calmodulin-regulated, anisotonic renal cell volume control (teleost), R1022
- Cholecystokinin  
central injection of, feeding effects on gastric emptying, R1165  
taste responsiveness and, R1371
- Cholesterol, diabetes and atherosclerosis, association of DOCA hypertension, R1042
- Chorda tympani nerve, taste detection, chemospecific deficits, R820
- Choroid plexus  
autoradiographic localization, ANP receptors, R57  
CSF production, vasopressin effects, R94  
thyroxine transport, transthyretin synthesis, R338
- Chromaffin cells, epinephrine release, angiotensin and low-sodium diet effects, R187
- Circulation: *see also* Blood flow; Microcirculation  
uterine, cardiovascular changes after closure, pregnancy, R1431
- Clearance, creatine, sustained maximal exertion (horse), R1177
- Cold  
acclimation, cytochrome oxidase capacity and, brown fat (gerbil), R1291  
exposure  
glycolysis regulation, muscle (bird), R711  
radiotelemetry measurement of core temperature, R743

- Comparative physiology, renal, measurement of blood flow (snake), R1313
- Coronary artery, vascular reactivity (trout), R1402
- Corpuscles of Stannius, stannocalcin synthesis (trout), R1157
- Corticosterone, neuropeptide Y and, hypothalamic function, R376
- Corticotropin-releasing factor, cardiovascular actions of, after sinoaortic denervation, R596
- Cortisol  
feedback inhibition, vasopressin and ACTH responses, awake state, R64  
neuroendocrine response, noise, awake state, R672  
pasteurellosis, sleep, fever and, R536  
response, hemorrhage, prolactin response relations (swine), R645  
secretion, adrenocortical oscillations, awake state, R578  
vasopressin effects, lung, fetus (sheep), R104
- Creatine, clearance: *see* Clearance
- Creatine kinase, scaled model, R1092
- CRF: *see* Corticotropin-releasing factor
- Cryobiology, adaptive strategies, amphibians and reptiles, R559
- Cryoprotectants, adaptive strategies, amphibians and reptiles, R559
- CSF: *see* Cerebrospinal fluid
- Cycloheximide, light effects (Aplysia), R256
- Cystic fibrosis, labial glands, cyclic nucleotide response in, R1320
- Cytochrome c oxidase, synthesis, catabolic arrest and, embryo (shrimp), R1184
- Cytochrome oxidase, capacity, brown fat, cold acclimation and (gerbil), R1291
- Cytokines, fever and interleukin 6, R798

## D

- Dehydration  
density of C receptors for ANF, glomerular membranes, R1084  
extracellular, pregnancy, salt appetite of offspring and, R281  
heat-induced vasodilation in, water and saline effects, limb (baboon), R318
- Deoxycorticosterone acetate, hypertension, diabetes mellitus and atherosclerosis, R1042
- Deoxyglucose, activation, efferent pathways, area postrema, R788
- Desensitization, adrenergic vasoconstriction, neuropeptide and norepinephrine effects, R736
- Desipramine hydrochloride, peripheral sympathetic nerve activity and, R876
- Deuterium, oxygen-18 and (bird), R804
- Development: *see also* Growth; Maturation  
early, sleep regulation during, R634
- Dexamethasone, feedback inhibition, vasopressin and ACTH responses, awake state, R64
- Dexfenfluramine, estradiol actions and, food intake and body weight in ovariectomy, R211
- Diabetes  
atherosclerosis and, association of DOCA hypertension, R1042  
streptozotocin, insulin regulation of uncoupling protein, brown fat, R418

- Diabetes mellitus  
angiotensins and, streptozotocin treatment and, awake state, R1147  
modulation of baroreflex and, awake state, R624  
streptozotocin treatment, blood pressure and, R852
- Dialysis, peritoneal, fluid and mass transfer, model, R958
- Diazepam, stimulating effect of cooling and, preoptic area, R393
- Diencephalon, osmosensitive hypothalamic neurons, hypertension and normotension, R175
- Diet: see Feeding
- Dihydropyridine, sugar transport and, skeletal muscle, R462
- Diltiazem, sugar transport and, skeletal muscle, R462
- Diuresis  
ANP release, pulmonary acid injury, R690  
enhanced atrial peptide natriuresis, angiotensin and aldosterone blockade, R1101  
head-out immersion and, quadriplegia, R1424  
vasopressin receptor-effector pathway, renal physiological evaluation, R763
- Diuretics  
chloride absorption, renal diluting segment (shark), R398  
hyperosmolality and, heat-induced vasodilation, limb (baboon), R309
- Diving, baroreceptor denervation, acute and chronic (duck), R895
- Dobutamine, insulin and glucose variation effects, baroreflexes, awake state, R624
- DOCA: see Deoxycorticosterone acetate
- Dopamine, regulation, median eminence blood flow (sheep), R1242
- Dorsal motor nucleus, vagal preganglionics, insulin and glucagon secretion, R160
- Dorsal raphe nucleus, pressor and sympathetic responses, TRH infusion and, R1464
- Doubly labeled water technique, deuterium and oxygen-18, abundance (bird), R804
- Drinking  
angiotensin II effects, awake state (sheep), R1230  
food-related, angiotensin II mediation of, R436  
spontaneous, hypertonicity or hypovolemia (pig), R143  
swallowing, systemic hypotension and, fetus (sheep), R130  
thirst, hypertonicity or hypovolemia (pig), R149
- Dynorphin, gastric satiety and, central nervous system effects (sheep), R947

## E

- Edema, pulmonary, hydrochloric acid, ANP release after lung injury, R690
- EEG: see Electroencephalography
- Efferent pathways, metabolic activation, area postrema, R788
- Elasmobranch  
ANP renal effects (dogfish), R1201  
fatty acid oxidation (fish), R756

- Elasticity, series, Fenn effects and, skeletal and cardiac muscle, R457
- Electrical activity  
extracellular pH and, during anoxia, brain (rat, turtle), R205  
paraventricular stimulation, vasopressin and oxytocin release, R155
- Electroencephalography  
sleep regulation, early development, R634  
time course, long sleep, R650
- Electrolytes, plasma, during shock, myocytes, R684
- Electromyography, esophageal fluid flow correlation, fetus, R1386
- Electroolfactogram, carbon dioxide effects, olfactory receptors (bullfrog), R1207
- Electrophysiology, CCK effects, taste responsiveness, R1371
- Embryo, catabolic arrest, cytochrome-c oxidase synthesis and (shrimp), R1184
- Enalaprilat, enhanced, angiotensin and aldosterone blockade, R1101
- Endocrine gland, response, head-out immersion, quadriplegia, R1424
- Endometrium, ion movement, electrical potential difference (guinea pig), R889
- Endothelin-2, regional hemodynamic effects, awake state, R912
- Endothelium-derived relaxing factor, analogue, coronary artery (trout), R1402
- Endotoxin  
antiserum against tumor necrosis factor, lipopolysaccharide fever and, R332  
glucose utilization enhanced by, ethanol attenuation of, R987  
insulin secretion and, pancreatic islets, R1070  
tolerance, centrally acting vasopressin, R443
- Energy  
adjustment, weight loss, ventrolateral hypothalamic lesions and, R476  
balance, brown fat composition for high body weight, R608  
brain, suckling and, R365  
equivalent, oxygen consumed, Weir equation, R1347  
expenditure, ileal transposition effects, R269
- Enkephalin, cardiovascular effects, rostral ventrolateral medulla, R325
- Enzymes: see also specific enzyme  
kallikrein-kinin system (trout), R501
- Epinephrine  
acid-base status and, exercise, R1411  
adrenal medullary response, hypoxia-direct and neural components, fetus (sheep), R1340  
antagonists, acid-base-electrolyte balance response to (salamander), R1363  
release, angiotensin effects, low-sodium diet, R187  
thermogenic response to, starvation effects, R87  
vasopressin effects, lung, fetus (sheep), R104
- Erythrocytes  
cell volume regulation by (skate), R1217  
glucose metabolism, sepsis effects, R21
- Erythropoietin  
production, hypoxia, acid-base status effects, R678

- serum levels, length of hypoxic exposure and, R1016
- Esophagus, fluid flow, electromyography correlation, fetus, R1386
- Estradiol  
dexfenfluramine actions and, food intake and body weight in ovariectomy, R211  
17 $\beta$ -endothelium-dependent contractions and, aorta, R1502
- Estrogen  
endothelium-dependent contractions and, aorta, R1502  
modulation, hypothalamic osmoregulation, female, R924  
receptors: see Receptors
- Estrous cycle, metabolic fuels and (hamster), R750
- Ethanol, attenuation, endotoxin-enhanced glucose utilization and, R987
- Exercise  
acid-base status, plasma catecholamines and, R1411  
 $\beta_2$ -adrenergic stimulation, potassium loss and, muscle, R1192  
maximal exertion, renal and systemic hemodynamic responses (horse), R1177  
metabolic control and, skeletal muscle, R288  
nonworking muscle, blood metabolites and ions with, R1486  
temperature regulation, pyrogen administration effects, R842  
thermoregulatory responses, circadian variation, R836  
training, glucose homeostasis and, R770
- Exertion: see Exercise

## F

- Facial vein, role in brain cooling (camel), R602
- Fasting, enhanced thermogenic response and, epinephrine, R87
- Fat, high body weight, brown fat composition and, R608
- Fatty acids  
composition, plasma and white adipose tissue (marmot), R1123  
metabolism, vagal sensory neurons and, R1395  
oxidation, mitochondrial and peroxisomal, elasmobranchs (fish), R756  
transport, mitochondrial, fuel partitioning and food intake, R216
- Feedback, negative, vasopressin and ACTH, awake state, R64
- Feeding  
body weight and, estradiol and dexfenfluramine actions in ovariectomy, R211  
CCK effects, taste responsiveness, R1371  
CNS injection of CCK, gastric emptying and, R1165  
dietary protein, effects on vasoactive hormones, R1095  
dietary sodium and chloride, angiotensin II receptors, R1008  
dorsal motor nucleus, cephalic phase insulin response, R523  
drinking related to  
angiotensin II mediation, R436  
hypovolemia or hypertonicity (pig), R143

entrainable, circadian pacemaker, light-dark cycle, R994  
 food restriction, metabolism effects on cardiac isomyosin, R346  
 fuel partitioning, mitochondrial fatty acid transport and, R216  
 gastric satiety, CNS dynorphin effects (sheep), R947  
 glucoprivic, glutamate decarboxylase activity and, ventromedial nucleus, R697  
 high-fat diet, weight gain, brown fat composition and, R608  
 ileal transposition effects, R269  
 ingestion, brain glucoprivation and keto-privation effects, suckling, R365  
 ingestion rate, satiety and, R662  
 lipoprivic, vagal sensory neurons and, R1395  
 liquid diet, CCK and, gastric emptying, R1165  
 low-phosphate diet, phosphaturic effects of PTH, propranolol and, R120  
 low-sodium diet, angiotensin effects on epinephrine release and, R187  
 meal patterns, weight cycling, females, R124  
 salt appetite, extracellular dehydration during pregnancy and, R281  
 Femur-medial collateral ligament-tibia unit, suspension effects, R725  
 Fenn effect, series elasticity and, skeletal and cardiac muscle, R457  
 Fetus: *see also* Lactation; Placenta;  
     Pregnancy  
     adrenal medulla catecholamine response, hypoxia-direct and neural components (sheep), R1340  
     breathing  
         daily pattern, maternal pinealectomy and (sheep), R284  
         heart rate relations (baboon), R1479  
     cardiovascular function, central opioid modulation, R1453  
     glucose consumption, placenta, model (sheep), R569  
     lung liquid secretion, vasopressin regulation of (sheep), R104  
     mercury exposure, released from dental amalgam fillings (sheep), R939  
     oxygen consumption, during sustained hypoxemia (lamb), R1108, R1116  
     prostaglandin synthesis inhibition, muscle reflexes and (lamb), R1213  
     renin secretion, renal (lamb), R388  
     swallowing, esophageal fluid flow and electromyography correlation, R1386  
     systemic hypotension, swallowing and (sheep), R130  
     transuterine ion movement, electrical potential difference (guinea pig), R889  
     urine flow, ANF, and AVP responses, temporal relations, hypertonic infusions (sheep), R469  
     water transfer, regulation, placental (sheep), R1257  
 Fever  
     antiserum against tumor necrosis factor, stress hyperthermia, R591  
     diazepam effects, cooling preoptic area, R393  
     effects, gastrointestinal flora, R552  
     interleukin 6 and, R798  
     pasteurellosis and, R536

prostaglandin E<sub>1</sub>, CSF pressure during, awake state, R783  
 vasopressin effects, endotoxin tolerance, R443  
 Filtration  
     glomerular  
         ANP effects, elasmobranch (dogfish), R1201  
         atrial appendectomy effects, R77  
 Fluid  
     amniotic, systemic hypotension and swallowing, fetus (sheep), R130  
     body, volume, heat-induced limb vasodilation (baboon), R309  
     cerebrospinal: *see* Cerebrospinal fluid  
 Fluorescein dextran, stimulation of hydrogen ion secretion, urinary bladder (turtle), R222  
 Force-length relations, series elasticity and Fenn effects, cardiac and skeletal muscle, R457  
 Forskolin, urea transport, salt acclimation and, bladder (toad), R883  
 Fuel  
     metabolic, estrous cycle and (hamster), R750  
     partitioning, food intake and, R216  
 Furosemide, stimulation of thirst (pig), R149

## G

GABA: *see*  $\gamma$ -Aminobutyric acid  
 Gas, blood, renin response to hemorrhage, awake state, R487  
 Gastric emptying, feeding effects, CCK and, R1165  
 Gastrointestinal flora, body temperature and, R552  
 Gestation, resource sharing, maternal cardiovascular hemodynamics, R1299  
 Gill, epithelium, neurohypophysial hormone receptor in (fish), R3  
 Glucagon  
     cephalic phase insulin response, vagal preganglionics, R523  
     secretion, vagal preganglionic stimulation of, R160  
 Glucocorticoids, feedback inhibition, vasopressin and ACTH responses, awake state, R64  
 Gluconeogenesis, exercise training and, R770  
 Glucoprivation, brain, ingestion and, suckling, R365  
 Glucose  
     brain, ingestion and, suckling, R365  
     consumption, placental, model (sheep), R569  
     endotoxin-enhanced utilization, ethanol attenuation of, R987  
     glutamate decarboxylase activity and, ventromedial nucleus, R697  
     homeostasis, training effects, R770  
     metabolism, sepsis effects, erythrocytes, R21  
     modulation of baroreflex, awake state, R624  
     response, interleukin 1, pancreatic islets, R1070  
     transport, calcium channel modifiers and, skeletal muscle, R462  
 Glutamate decarboxylase, activity, serum glucose effects, ventromedial nucleus, R697

Glycerol, counteracting effects of urea and betaine, mammalian cells, R198  
 Glycogenesis, lactate, skeletal muscle fiber types, R903  
 Glycolysis  
     anoxia and, <sup>31</sup>P-NMR (earthworm), R1132  
     regulation, cold exposure and, pectoralis muscles (bird), R711  
 Glycoprotein, synthesis, corpuscles of Stannius (trout), R1157  
 Growth: *see also* Development; Maturation  
     ion depletion, angiotensin II receptors and, brain, R1008  
 Guanosine diphosphate, binding, insulin regulation, brown fat, R418  
 Guanosine monophosphate, cyclic  
     ANF infusion, hemodynamic, renal, and endocrine actions (sheep), R1279  
     hematocrit and, volume expansion, immaturity and, R729  
     response, cystic fibrosis, labial glands, R1320  
 Gustatory response  
     CCK effects, R1371  
     detection, chemospecific deficits, R820

## H

### Heart

baroreceptor reflexes, vasopressinergic augmentation of, awake state, R860  
 compensated failure, ANF and postprandial control of sodium excretion, R232  
 innervation, somatostatin and (snake), R1001  
 isomyosin, metabolism effects, food restriction, R346  
 Heart atria  
     appendectomy, ANF and sodium excretion, hypertension, R77  
     prolonged stretch, renal and hormonal responses, R1286  
 Heart rate  
     angiotensins, streptozotocin treatment and, awake state, R1147  
     autonomic control, ANF influences of, R718  
     breathing relations, fetus (baboon), R1479  
     central opioid modulation, fetus, R1453  
     fasting effects, enhanced response to epinephrine, R87  
     hemorrhage, area postrema and, R1472  
     intrinsic, central effects of CRF after sinoaortic denervation, R596  
     leukotriene receptors and, awake state, R1034  
     prostaglandin E<sub>1</sub>, fever, CSF pressure, awake state, R783  
     spontaneous hypertension, GABAergic responses in, R450  
     streptozotocin treatment and, R852  
     TRH infusions and, dorsal raphe nucleus, R1464  
     vasopressinergic augmentation, awake state, R860

### Heat

exposure  
     pyrogen administration and, exercise, R842  
     radiotelemetry measurement of core temperature, R743

**Heat stress**

- vasodilation, hyperosmolality and diuretic effects (baboon), R309
- vasodilation induced by, during dehydration, water and saline effects, limb (baboon), R318

**Hematocrit**

- ANP response and, volume expansion, immaturity and, R729
- behavioral thermoregulation and (toad), R848
- decreased, plasma renin response to, awake state, R487

**Hemodynamics, angiotensin II effects, awake state (sheep), R1230****Hemorrhage**

- arterial pressure after, area postrema and, R1472
- AVP and ANP responses, cardiopulmonary denervation, R704
- prolactin response, adrenocorticotropin response relations (swine), R645
- renin-angiotensin system and opioids, awake state, R543
- renin response to, awake state, R487

**Hepatocytes, temperature adaptation, phospholipid synthesis (trout), R1495****Hibernation**

- acid-base status and temperature effects, hippocampal population spikes and (hamster), R1140
- lipid composition, plasma and white adipose tissue (marmot), R1123
- winter, ectothermic vertebrates, R559

**Hippocampus, population spikes, acid-status and temperature effects (hamster), R1140****Histamine, food-related drinking, angiotensin II and, R436****Homeostasis, fluid and cardiovascular, nuclei for, brain, R57****Hormonal responses, prolonged atrial stretch, R1286****Hydrochloric acid, lung injury, ANP release after, R690****Hydrogen ions**

- during anoxia, brain (rat, turtle), R205
- secretion, stimulation by carbon dioxide, bladder (turtle), R222

**Hyperosmolality**

- diuretics and, heat-induced vasodilation, limb (baboon), R309
- heat-induced vasodilation and, dehydration, limb (baboon), R318
- vasopressin release, parabrachial nucleus modulation of, R358

**Hyperreflexia, autonomic, chronic cervical spinal cord injury and, R169****Hypertension**

- acute vasopressin, atrial appendectomy effects, R77
- ANF in exaggerated natriuresis, renal interstitial hydrostatic pressure and, R1380
- DOCA, induction of atherosclerosis with diabetes, R1042
- extracellular dehydration during pregnancy, salt appetite of offspring and, R281
- intracranial, after cerebroventricular infusions, awake state, R1170
- osmosensitive hypothalamic neurons from, R175
- spontaneous
  - body temperature regulation and, R1064

**calcitonin gene-related peptides, R425**

- GABAergic responses, ventrolateral medulla, R450
- maternal cardiovascular hemodynamics, R1299
- radiotelemetry measurement of core temperature, R743
- skeletal muscle properties, R352

**Hyperthermia, stress, antiserum against tumor necrosis factor, R591****Hypertonicity, stimulation, spontaneous drinking (pig), R143, R149****Hypertonic solutions, urine flow responses to, fetus (sheep), R469****Hypocalcemic hormone, synthesis, corpuscles of Stannius (trout), R1157****Hypogastric nerve, cholinergic transmission in, sympathetic modulation by adrenoceptors, R44****Hypoglycemia, glutamate decarboxylase activity and, brain, R697****Hypotension**

- anaphylactic, renal nerve activity effects, R383
- arterial, feedback inhibition of vasopressin and ACTH, awake state, R64
- gestation, maternal cardiovascular hemodynamics, R1299
- orthostatic, vasopressin release, quadriplegia, R827
- sympathetic traffic, plasma norepinephrine and, R982
- systemic, swallowing and, fetus (sheep), R130

**Hypothalamus**

- dorsal raphe nucleus, TRH infusion effects, R1464
- function, neuropeptide Y and, R376
- lateral, ascending collaterals of, R1051
- lateral area, sympathetic responses, R245
- osmoregulation, estrogen modulation of, female, R924
- periventricular neurons, differential osmoreponsiveness (duck), R973
- steroid receptors, day length and (sheep), R135
- ventromedial lesions, energy adjustment to weight loss, R476

**Hypovolemia, stimulation, spontaneous drinking (pig), R143, R149****Hypoxemia**

- sustained
  - blood flow and oxygen delivery during, fetus (lamb), R1116
  - progressive acidemia with, oxygen consumption during, fetus (lamb), R1108

**Hypoxia**

- erythropoietin production, acid-base status effects, R678
- length of exposure, serum erythropoietin levels and, R1016
- lung liquid secretion, vasopressin effects, fetus (sheep), R104

**I****Ileum**

- actin mRNA in, intestinal bypass effects, R39
- transposition, obesity and, R269
- Immersion, head-out, cardiovascular, renal, and endocrine responses, quadriplegia, R1424
- Indomethacin, fever and interleukin 6, R798

**Ingestion: see Feeding****Insulin**

- cephalic phase response, vagal preganglionic mediation of, R523
- endotoxin-enhanced utilization, ethanol attenuation of, R987
- modulation of baroreflex, awake state, R624
- regulation, uncoupling protein, brown fat, R418
- secretion
  - interleukin 1 effects, pancreatic islets, R1070
  - vagal preganglionic stimulation of, R160

**Interleukin 1**

- insulin secretion and, pancreatic islets, R1070
- temperature regulation, exercise, R842
- Interleukin 6, fever and, R798

**Intestine**

- absorption and metabolism, ascorbic acid (trout), R1238
- bypass, actin mRNA with, ileal smooth muscle, R39
- motility: see Motility
- Ionophore A23187, endothelium-dependent contractions, estradiol effects, aorta, R1502

**Ions, transuterine movement, electrical potential difference, pregnancy (guinea pig), R889****Islets of Langerhans, vagal preganglionics, insulin and glucagon secretion, R160****Isomyosin, cardiac, metabolism effects, food restriction, R346****Isoproterenol**

- pharmacological responsiveness, eccrine secretory coil cells (monkey), R1355
- renin secretion and, kidney, fetus (lamb), R388
- Isotocin, neurohypophyseal hormone receptor, gill epithelium (fish), R3

**K****Kallikrein, generation of vasoactive substances, plasma (trout), R507****Kallikrein-kinin system**

- enzymes of (trout), R501
- vascular effects of kinins, bradykinin metabolism, gill (trout), R515

**Ketones, brain, ingestion and, suckling, R365****Ketoprivation, brain, ingestion and, suckling, R365****Kidney**

- ANF infusion actions (sheep), R1279
- ANP effects, elasmobranch (dogfish), R1201
- diluting segment
  - apical membranes and cellular resistance (shark), R409
  - chloride absorption (shark), R398
- erythropoietin production, hypoxia, acid-base status effects, R678
- hemodynamics, sustained maximal exertion (horse), R1177
- interstitial hydrostatic pressure
  - ANF in exaggerated natriuresis and, hypertension, R1380
  - natriuresis of ANF and, R481
  - natriuretic response to ANP, R133
- micropuncture study, mannitol or sodium chloride (bird), R869

- regulation, plasma ANP, R531  
 renin secretion, fetus (lamb), R388  
 response  
   head-out immersion, quadriplegia, R1424  
   prolonged atrial stretch, R1286  
   sodium excretion, ANP and, awake state, R1445  
   vasopressin receptor-effector pathway, physiological evaluation, R763  
 Kidney cells, urea and betaine, counteracting effects, R198  
 Kidney glomerulus  
   individual, measurement of blood flow (snake), R1313  
   membrane, density of C receptors for ANP, dehydration effects, R1084  
 Kidney medulla, interstitial hydrostatic pressure, natriuretic response to ANP, R133  
 Kidney tubules  
   cortical collecting, arginine vasopressin effects, R99  
   diluting segment  
     apical membranes and cellular resistance (shark), R409  
     chloride absorption (shark), R398  
   interstitial hydrostatic pressure, natriuretic response to ANP, R133  
   proximal  
     increased sodium reabsorption, prostaglandin  $E_2$  and, R82  
     osmoregulation, basolateral cell membrane role in (teleost), R1022  
 Kinins, vascular effects, bradykinin metabolism, gill (trout), R515

## L

- Labial glands, cystic fibrosis, cyclic nucleotide response in, R1320  
 Lactate  
   concentration, erythrocytes, sepsis effects, R21  
   exercise effects, nonworking muscle, R1486  
   glycogenesis from, skeletal muscle fiber types, R903  
 Lactation: *see also* Fetus; Placenta;  
   Pregnancy  
   changes induced by, brown fat, prolactin role in, R51  
   fetal mercury exposure, released from dental amalgam fillings (sheep), R939  
 Lanthanum, stimulation of hydrogen ion secretion, urinary bladder (turtle), R222  
 Leukocytes, pasteurellosis, sleep, fever and, R536  
 Leukotrienes, receptor: *see* Receptors  
 Light  
   ocular proteins and (*Aplysia*), R256  
   target distance and, pupil size, R813  
 Light-dark cycle, phase-shifting, food-entrainable circadian pacemaker, R994  
 Lipids  
   composition, plasma and white adipose tissue (marmot), R1123  
   metabolism  
     mitochondrial and peroxisomal, elasmobranchs (fish), R756  
     mitochondrial fatty acid transport and, R216  
   peroxidation, aging and, skeletal muscle and liver, R918  
 Lipolysis, fasting effects, enhanced response to epinephrine, R87  
 Lipopolysaccharide fever, antiserum against tumor necrosis factor and, R332  
 Lipoprotein lipase, weight cycling, varying meal patterns and, females, R124  
 Liver  
   antioxidant enzyme alterations, aging and, R918  
   cells: *see* Hepatocytes  
   cytochrome oxidase capacity, cold acclimation and (gerbil), R1291  
 Lombricine kinase, anoxia,  $^{31}\text{P}$ -NMR (earthworm), R1132  
 Lung  
   acid injury, ANP release after, R690  
   liquid secretion, regulation by vasopressin, fetus (sheep), R104  
 Lymphatics, thoracic duct, outflow pressure and vascular volume loading effects (sheep), R240  
 Lymph flow, thoracic duct, outflow pressure and vascular volume loading effects (sheep), R240

## M

- Malabsorption, ileal transposition effects, R269  
 Mannitol, micropuncture study, kidney (bird), R869  
 Maturation: *see also* Development; Growth  
   volume expansion, hematocrit and ANP effects, R729  
 Melatonin, pinealectomy, fetal breathing and (sheep), R284  
 Membrane  
   apical, cellular resistance and, renal diluting segment (shark), R409  
   basal, potassium uptake, midgut (tobacco hornworm), R112  
   basolateral cell, proximal tubule osmoregulation and (teleost), R1022  
 Mercaptoacetate, vagal sensory neurons, lipoprivic feeding and, R1395  
 Mercaptopicolinic acid, glycogen synthesis and, skeletal muscle fiber types, R903  
 Mercury, released from dental amalgam fillings maternal-fetal distribution (sheep), R939  
 Metabolic rate  
   aminophylline effects, weanlings, R193  
   basal, skeletal muscle properties, R352  
   fasting effects, enhanced response to epinephrine, R87  
   Weir equation for, reappraisal of, R1347  
 Methacholine, pharmacological responsiveness, eccrine secretory coil cells (monkey), R1355  
 3-O-Methylglucose, sugar transport and, skeletal muscle, R462  
 Metoclopramide, lactation-induced changes and, brown fat, R51  
 Microcirculation: *see also* Blood flow;  
   Circulation  
   renal, individual glomeruli (snake), R1313  
 Microelectrode, potassium-selective, basal membrane, midgut (tobacco hornworm), R112  
 Microgravity, biomechanics and, bone, R1327  
 Microneurography, sympathetic activity, plasma norepinephrine and, R982

- Micropuncture, renal, mannitol or sodium chloride (bird), R869  
 Micturition, reflexes: *see* Reflexes  
 Models  
   computer, light and target distance on pupil size, R813  
   fluid and mass transfer, peritoneal dialysis, R958  
   glucose consumption and transfer, placenta (sheep), R569  
   placental water exchange, regulation of, fetus (sheep), R1257  
   scaled, creatine kinase, R1092  
   tail suspension, R725  
   two-element, series elasticity and Fenn effects, muscle, R457  
   two-process, time course of EEG power density, long sleep, R650  
 Molting, renal function and (bird), R869  
 Motility, intestinal, bypass effects, ileal smooth muscle, R39  
 Muscle  
   cold exposure, glycolysis regulation (bird), R711  
   exercising,  $\beta_2$ -adrenergic stimulation and potassium loss, R1192  
   nonworking, blood metabolites and ions, intense intermittent exercise, R1486  
   reflexes: *see* Reflexes  
 Muscle, heart, Fenn effects, series elasticity and, R457  
 Muscle, skeletal  
   antioxidant enzyme alterations, aging and, R918  
   cytochrome oxidase capacity, cold acclimation and (gerbil), R1291  
   exercising, metabolic control in, R288  
   Fenn effects, series elasticity and, R457  
   fiber, glycogenesis from lactate, R903  
   properties, hypertension and, R352  
   sodium activity and concentration, hemorrhagic shock, R684  
   sugar transport, calcium channel modifier effects, R462  
 Muscle, smooth  
   ileal, actin mRNA in, intestinal bypass effects, R39  
   ontogeny of vasoconstrictor neurohypophysial hormone function, R263  
   vascular  
     diabetes mellitus and atherosclerosis, R1042  
     ontogeny of vasoconstrictor neurohypophysial hormone function, R263  
 Muscle fiber, type, hypertension and, R352  
 Myocardium, inotropism, glucose and insulin variation, awake state, R624  
 Myocytes, sodium activity, hemorrhagic shock, R684

## N

- Naloxone  
   cardiovascular effects, rostral ventrolateral medulla, R325  
   renin-angiotensin system and, acute hemorrhage, awake state, R543  
 Natriuresis  
   ANP and, awake state, R1445  
   exaggerated, ANF in, renal interstitial hydrostatic pressure and, hypertension, R1380  
   head-out immersion and, quadriplegia, R1424  
   pressure, atrial appendectomy effects, R77

Natriuresis (*continued*)  
 response to ANP, renal interstitial hydrostatic pressure effects, R1333  
*Neisseria gonorrhoeae*, somnogenic, pyrogenic, and hematologic effects, R182  
 Neonate: *see also* Newborn  
 decerebrate and spinalized, micturition reflexes, R1508  
 Nephron, flow rate, measurement (snake), R1313  
 Neuroendocrine response, noise, awake state, R672  
 Neurohypophyseal hormone, vasoconstrictor, ontogeny of function, R263  
 Neurohypophysis, osmotic regulation, vasopressin and oxytocin release, R492  
 Neuromedin U, regional hemodynamic effects, awake state, R32  
 Neuromodulators, prostaglandin synthesis inhibition, muscle reflexes and, fetus (lamb), R1213  
 Neurons  
 area postrema, systemic angiotensin effects, R70  
 cardiac, somatostatin in (snake), R1001  
 cholinergic transmission in, sympathetic modulation by adrenoceptors, R44  
 hypothalamic, hypertension and normotension, R175  
 medullary barosensitive, ascending collaterals of, R1051  
 periventricular, differential osmosensitivity, hypothalamus (duck), R973  
 thoracic spinal, urinary bladder input effects, R10  
 vagal sensory, lipoprivic feeding and, R1395  
 Neuropeptides  
 innervation and, heart (snake), R1001  
 receptors: *see* Receptors  
 Neuropeptide Y  
 hypothalamic function and, R376  
 norepinephrine and, vasoconstrictor cooperation, R736  
 Neurosecretory cells, vasopressin, noxious somatic stimuli excitation of, R1516  
 Neurotransmitters, bombesin inhibition of chloride secretion and, rectal gland (dogfish), R1459  
 Newborn: *see also* Neonate  
 vasoconstrictor neurohypophyseal hormone, ontogeny of function, R263  
 Nitroprusside  
 feedback inhibition, vasopressin and ACTH responses, awake state, R64  
 sympathetic activity, plasma norepinephrine and, R982  
<sup>31</sup>P-NMR: *see* Nuclear magnetic resonance  
 Norepinephrine  
 acid-base status and, exercise, R1411  
 adrenal medullary response, hypoxia-direct and neural components, fetus (sheep), R1340  
 antagonists, acid-base-electrolyte balance response to (salamander), R1363  
 brain cooling, facial vessel role in (camel), R602  
 control of thyroxine deiodinase, obesity, brown fat, R430  
 endothelium-dependent contractions to, estradiol effects, aorta, R1502  
 neuropeptide Y and, vasoconstrictor cooperation, R736  
 plasma, sympathetic traffic and, during hypotension, R982

regulation, median eminence blood flow (sheep), R1242  
 Nuclear magnetic resonance, <sup>31</sup>P-, phosphate acceptor and phosphagen pool sizes (earthworm), R1132  
 Nucleotides, cyclic, labial glands, cystic fibrosis, R1320  
 Nucleus tractus solitarius  
 area postrema neurons, systemic angiotensin effects, R70  
 CCK effects, taste responsiveness, R1371  
 stimulation, vasopressin and oxytocin release, R155  
 Obesity  
 adrenergic effects on thyroxine deiodinase, brown fat, R430  
 estradiol actions, dexfenfluramine and, ovariectomy, R211  
 ileal transposition effects, R269  
 weight cycling, varying meal patterns and, females, R124  
 Olfactory receptors: *see* Receptors  
 Opioids  
 modulation of cardiovascular function, central nervous system, fetus, R1453  
 renin-angiotensin system and, acute hemorrhage, awake state, R543  
 Osmolytes, organic, counteracting effects of urea and betaine, R198  
 Osmoregulation  
 counteracting effects of urea and betaine, mammalian cells, R198  
 differential, hypothalamus (duck), R973  
 hypothalamic, estrogen modulation of, female, R924  
 potassium role in, erythrocytes (skate), R1217  
 proximal tubule, basolateral cell membrane role in (teleost), R1022  
 vasopressin release, quadriplegics, R827  
 Osmosensitivity, neuronal, hypertension, R175  
 Ovariectomy, estrogen modulation, hypothalamic osmoregulation, R924  
 Ovary cells, Chinese hamster, counteracting effects of urea and betaine, R198  
 Ovulation, metabolic fuels and (hamster), R750  
 Oxfenicine, cardiac isomyosin profile, metabolism effects, R346  
 Oxidation, fatty acids, mitochondrial and peroxisomal, elasmobranchs (fish), R756  
 Oxygen  
 ANP effects, arterioles of terminal microvasculature (hamster), R1224  
 chemoreceptor activity sensitive to, propranolol effects, gill (trout), R1089  
 consumption  
 energy adjustment to weight loss, ventrolateral hypothalamic lesions and, R476  
 sustained hypoxemia with progressive acidemia, fetus (lamb), R1108  
 Weir equation for metabolic rate, R1347  
 delivery, sustained hypoxemia, fetus (lamb), R1116  
 tension, reduced, adrenal medullary catecholamine response, fetus (sheep), R1340

Oxygen-18, deuterium and (bird), R804  
 Oxygen radicals, antioxidant enzyme alterations, skeletal muscle and liver, R918  
 Oxytocin  
 release  
 osmotic regulation of, R492  
 paraventricular stimulation and, R155

## P

Pacemaker, circadian, food-entrainable, light-dark cycle, R994  
 Pancreas  
 cephalic phase insulin response, vagal preganglionics, R523  
 interleukin 1 effects, insulin secretion, R1070  
 vagal preganglionics, insulin and glucagon secretion, R160  
 Pancreatic islets, interleukin 1 effects, insulin secretion, R1070  
 Parabrachial nucleus  
 lateral area, sympathetic responses, R245  
 modulation, vasopressin release, R358  
 Parathyroid hormone, phosphaturic effects of, propranolol and, short-term phosphate deprivation, R120  
 Paraventricular nucleus  
 neuropeptide Y and, R376  
 stimulation, vasopressin and oxytocin release, R155  
 Pastuerellosis, experimental, somnogenic, pyrogenic and hematologic effects, R536  
 Pectoralis muscle, cold exposure, glycolysis regulation (bird), R711  
 Pelvic nerve, cholinergic transmission in, sympathetic modulation by adrenoceptors, R44  
 Pentobarbital, anesthesia, renal action of ANP, R616  
 Peptides  
 atrial: *see* Atrial natriuretic peptide  
 calcitonin gene-related, spontaneous hypertension, R425  
 neurohypophyseal, analogues, gill epithelium (fish), R3  
 release, paraventricular stimulation and, R155  
 vasoactive intestinal, inhibition of chloride secretion, rectal gland (dogfish), R1459  
 Peptidoglycan, bacterial, sleep and temperature with, R182  
 Peripheral nerve, blood-nerve barrier, L-phenylalanine transport, R1436  
 Permeability, osmotic water, vasopressin effects, cortical collecting tubules, R99  
 pH  
 arterial, renin response to hemorrhage, awake state, R487  
 blood, during shock, myocytes, R684  
 extracellular, electrical activity and, during anoxia, brain (rat, turtle), R205  
 intracellular, cytochrome-c oxidase synthesis and (shrimp), R1184  
 temperature and, hippocampal population spikes and (hamster), R1140  
 Phase shift, ocular proteins and (*Aplysia*), R256  
 Phentolamine, acid-base-electrolyte balance response to (salamander), R1363

L-Phenylalanine, facilitated transport, blood-nerve barrier, peripheral nerve, R1436

Phloretin, urea transport, salt acclimation and, bladder (toad), R883

Phorbol esters, cell volume regulation and, erythrocytes (skate), R1217

Phosphagen, pool sizes, direct observation of (earthworm), R1132

Phosphate acceptor, direct observation of (earthworm), R1132

deprivation, phosphaturic effects of PTH, propranolol and, R120

Phosphofructokinase, cold exposure, glycolysis regulation of, muscle (bird), R711

Phospholipids, synthesis, temperature adaptation and, hepatocytes (trout), R1495

Photoperiod, neuroendocrine estrogen and progesterin receptors and (sheep), R135

Pinealectomy, maternal, daily pattern of fetal breathing and (sheep), R284

Pituitary gland, steroid receptors, day length and (sheep), R135

Placenta: *see also* Fetus; Lactation; Pregnancy

glucose consumption, model (sheep), R569

water exchange, model (sheep), R1257

Plasma, white adipose tissue and, lipid composition (marmot), R1123

Polyethylene matrix, interstitial hydrostatic pressure, natriuresis of ANF and, renal, R481

Polyhydramnios, water exchange, placental, regulation, fetus (sheep), R1257

Potassium

angiotensin II effects, awake state (sheep), R1230

cell volume regulation and, erythrocytes (skate), R1217

loss,  $\beta_2$ -adrenergic stimulation and, exercising muscle, R1192

uptake, basal membrane, midgut (tobacco hornworm), R112

Potassium ions, transuterine movement, electrical potential difference (guinea pig), R889

Potentials

electrical, transuterine ion movement and, pregnancy (guinea pig), R889

evoked, during anoxia, brain (rat, turtle), R205

membrane, hemorrhagic shock, myocytes, R684

redox, intestinal absorption of ascorbic acid (trout), R1238

Pregnancy: *see also* Fetus; Lactation; Pregnancy

baroreflex control of sympathetic outflow, captopril effects, R1417

changes induced by, brown fat, prolactin role in, R51

extracellular dehydration during, salt appetite of offspring and, R281

resource sharing, maternal cardiovascular hemodynamics, R1299

transuterine ion movement, electrical potential difference (guinea pig), R889

uterine circulation, cardiovascular changes after closure, R1431

Preoptic area, cooling of, diazepam effects, R393

Pressure: *see also* Blood pressure

arterial

after hemorrhage, area postrema and, R1472

ANF infusion effects (sheep), R1279

closure of uterine circulation and, pregnancy, R1431

inhibition of rostral ventrolateral medulla, R1271

naloxone effects, R325

spontaneous hypertension, R450

atrial, angiotensin II effects, awake state (sheep), R1230

CSF

during prostaglandin  $E_1$  fever, awake state, R783

intracranial hypertension, awake state, R1170

interstitial hydrostatic

renal, ANF in exaggerated natriuresis and, hypertension, R1380

renal, natriuresis of ANF and, R481

renal, natriuretic response to ANP and, R1333

osmotic, placental water transfer, fetus (sheep), R1257

outflow, thoracic duct lymph flow and (sheep), R240

Pressure-volume relations, intracranial hypertension, CSF pressure, awake state, R1170

Progesterone, receptors: *see* Receptors

Prolactin

lactation-induced changes and, brown fat, R51

renal function and (bird), R869

response, hemorrhage, adrenocorticotropin response relations (swine), R645

Propranolol

acid-base-electrolyte balance response to (salamander), R1363

cardiovascular actions of, after sinoaortic denervation, R596

oxygen-sensitive chemoreceptor activity, gill (trout), R1089

phosphaturic effect of PTH and, short-term phosphate deprivation, R120

Prostacyclin, endothelium-dependent contractions to, estradiol effects, aorta, R1502

Prostaglandin  $E_1$ , fever, CSF pressure during, awake state, R783

Prostaglandin  $E_2$ , increased sodium reabsorption induced by, proximal tubules, R82

Prostaglandins

binding sites, aortic endothelium (chicken), R777

synthesis inhibition, muscle reflexes and, fetus (lamb), R1213

Protein

dietary, intake effects, vasoactive hormones, R1095

ocular, light and (*Aplysia*), R256

uncoupling

brown fat, regulation by insulin, R418

brown fat composition for high body weight, R608

PTH: *see* Parathyroid hormone

Pulmonary edema: *see* Edema

Pump, sodium-potassium,  $\beta_2$ -adrenergic stimulation, exercising muscle, R1192

Pupil, size, light and target distance effects, R813

Pyridostigmine bromide, inhibition, skin blood flow and, R951

Pyrogen

administration, temperature regulation in exercise and, R842

antiserum against tumor necrosis factor, lipopolysaccharide fever and, R332

## Q

Quadriplegia

cardiovascular, renal, and endocrine responses, head-out water immersion, R1424

vasopressin release, osmotically stimulated, R827

## R

Radiotelemetry, measurement, core temperature, hypertension, R743

Receptors

adrenoceptors,  $\alpha_1$  and  $\alpha_2$ , vesical ganglia mediated by, R44

angiotensin, generation of vasoactive substances, plasma (trout), R507

angiotensin II, chloride and sodium depletion effects, R1008

ANP, autoradiographic localization of, brain, R57

baroreceptors

activation, inhibition of rostral ventrolateral medulla, R1271

acute and chronic denervation, diving and (duck), R895

denervation, carotid and sinoaortic (baboon), R930

desipramine hydrochloride, R876

C, ANF, glomerular membrane, dehydration effects, R1084

chemoreceptor, activity sensitive to oxygen, propranolol effects (trout), R1089

leukotriene, hemodynamic responses, awake state, R1034

neuroendocrine estrogen and progesterin, day length effects (sheep), R135

neurohypophyseal hormone, gill epithelium (fish), R3

neuropeptide, autoradiographic localization of, brain, R57

olfactory, carbon dioxide effects (bullfrog), R1207

steroid, day length effects (sheep), R135

subtypes, brain, ANP distribution, R1078

Rectal gland, somatostatin effects, bombesin inhibition of chloride secretion and (dogfish), R1459

Red blood cells: *see* Erythrocytes

Reflexes

baroreceptor

anaphylactic hypotension and, R383

cardiac, vasopressinergic augmentation of, awake state, R860

control of sympathetic outflow, pregnancy, R1417

denervation, carotid and sinoaortic (baboon), R930

inhibition of rostral ventrolateral medulla, R1271

modulation by insulin and glucose, awake state, R624

naloxone effects, R325

sympathetic activity and plasma norepinephrine, R982

micturition, decerebrate and spinalized neonates, R1508

## Reflexes (continued)

- muscle, prostaglandin synthesis inhibition and, fetus (lamb), R1213
- spinal autonomic, chronic cervical spinal cord injury and, R169

## Renal nerve

- activity, anaphylactic hypotension, R383
- mediation, sympathetic responses from insular cortex, R245

## Renin

- carotid and sinoaortic denervation, baroreceptor denervation (baboon), R930
- plasma activity
  - dietary protein intake effects, R1095
  - head-out immersion, quadriplegia, R1424

- response, hemorrhage, awake state, R487
- secretion, kidney, fetus (lamb), R388

## Renin-angiotensin-aldosterone system

- ANF infusion, hemodynamic, renal, and endocrine actions (sheep), R1279
- postprandial control, compensated heart failure, R232

## Renin-angiotensin system

- chloride and sodium depletion effects, R1008
- opioids and, acute hemorrhage, awake state, R543
- renal effects of ANP, pentobarbital anesthesia and, R616

## Resistance

- cellular, apical membranes, renal diluting segment (shark), R409
- peripheral
  - angiotensin II effects, awake state (sheep), R1230
  - atrial peptide effects (hamster), R1224
  - hindlimb, diving response (duck), R895

## Respiration

- carbon dioxide effects, olfactory receptors (bullfrog), R1207
- fetal
  - daily pattern, maternal pinealectomy and (sheep), R284
  - esophageal fluid flow and electromyography correlation, R1386
  - heart rate relations and, fetus (baboon), R1479

- Respiratory quotient, Weir equation, R1347

- Respiratory sinus, arrhythmia, heart rate relations, fetus (baboon), R1479

## Rhythms

- circadian
  - CSF pressure in intracranial hypertension, R1170
  - fetus, maternal pinealectomy and (sheep), R284
  - food-entrainable, light-dark cycle, R994
  - thermoregulatory response during exercise, R836
  - time course of EEG power density, R650
  - ultradian, adrenocortical, awake state, R578
  - urinary output, computer-assisted long-term measurements, R274
- Rostral ventrolateral medulla
  - collateralized neurons, ascending collaterals of, R1051
  - inhibition by baroreceptor activation, caudal ventrolateral medulla and, R1271
  - naloxone cardiovascular effects, R325

## S

- Saline, intake, heat-induced vasodilation in dehydration, limb (baboon), R318
- Salivary glands, cyclic nucleotide response in, R1320

## Salt

- acclimation, urea transport and, bladder (toad), R883
- appetite, extracellular dehydration during pregnancy and, R281
- Sarafotoxin S6b, regional hemodynamic effects, awake state, R912
- Saralasin, prostaglandin E<sub>2</sub>-induced increase in sodium and, proximal tubules, R82

## Satiety

- gastric signals, central nervous system and (sheep), R947
- ingestion rate effects, behavioral analysis, R662

- Sciatic nerve, blood-nerve barrier, L-phenylalanine transport, R1436

- Seasonal variation, deuterium and oxygen-18, doubly labeled water technique (bird), R804

- Secretory coil cells, eccrine, pharmacological responsiveness (monkey), R1355

- Sepsis, glucose metabolism and, erythrocytes, R21

- Serotonin, turnover, brain (carp), R1308

## Shock

- anaphylactic, renal nerve activity effects, R383
- hemorrhagic, sodium activity and, myocytes, R684

- Shunt, arteriovenous, cardiovascular changes, pregnancy, R1431

## Sleep

- bacterial peptidoglycan effects, R182
- long, time course of EEG power density during, R650
- pasteurellosis and, R536
- regulation, early development, R634

## Sodium

- activity, hemorrhagic shock, myocytes, R684
- angiotensin II effects, awake state (sheep), R1230
- concentration, erythrocytes, sepsis effects, R21
- depletion, differential effects, angiotensin II receptors, R1008
- excretion
  - ANF and postprandial control, compensated heart failure, R232
  - ANP and, awake state, R1445
  - atrial appendectomy effects, hypertension, R77
  - interstitial hydrostatic pressure effects, kidney, R133
  - renal, pentobarbital anesthesia effects, R616
  - plasma ANP regulation, central nervous system, R531
  - reabsorption, increased, prostaglandin E<sub>2</sub> and, proximal tubules, R82
  - regulation, osmosensitive hypothalamic neurons, R175

- Sodium chloride
  - counteracting effects of urea and betaine, mammalian cells, R198
  - micropuncture study, kidney (bird), R869
  - thresholds, taste detection, R820

- Sodium ions, transuterine movement, electrical potential difference (guinea pig), R889

- Soleus muscle, properties, hypertension and, R352

- Solitary tract, nucleus, area postrema, metabolism of, R788

- Solutes, transport, peritoneal dialysis, model, R958

## Somatostatin

- bombesin inhibition of chloride secretion and, rectal gland (dogfish), R1459
- innervation and, heart (snake), R1001
- Sorbitol, counteracting effects of urea and betaine, mammalian cells, R198
- Spaceflight, biomechanical properties and, vertebrae, R1327
- Spectral analysis, time course of EEG power density, long sleep, R650

## Spinal cord

- cervical, chronic injury, autonomic hyperreflexia and, R169
- injury, vasopressin release, osmotically stimulated, R827

- Spinoreticular cells, inhibition, urinary bladder and hindlimb stimuli, R10

- Stannocalcin, synthesis, corpuscles of Stannius (trout), R1157

- Staphylococcus aureus*, somnogenic, pyrogenic, and hematologic effects, R182

- Starvation: see Fasting

- Steroids, receptors: see Receptors

- Stomach, satiety, ingestion rate effects, R662

- Streptomycin, gastrointestinal flora, body temperature effects, R552

## Streptozotocin

- treatment
  - blood pressure and, R852
  - central effects of angiotensins, awake state, R1147

## Stress

- hyperthermia, antiserum against tumor necrosis factor, R591
- spontaneous hypertension, body temperature regulation and, R1064

- Succinate, anoxia and, <sup>31</sup>P-NMR (earthworm), R1132

## Sucrose

- ingestion, behavioral analysis of satiety, R662
- thresholds, taste detection, R820

- Sugar, transport, calcium channel modifiers and, skeletal muscle, R462

- Suprachiasmatic nucleus, neuropeptide Y and, R376

## Supraoptic nucleus

- osmotic regulation, vasopressin and oxytocin release, R492
- vasopressin cells, noxious somatic stimuli excitation of, R1516

## Swallowing

- esophageal fluid flow, electromyography correlation, fetus, R1386
- systemic hypotension effects, fetus (sheep), R130

- Sweat gland, cell culture, pharmacological responsiveness (monkey), R1355
- Sweating, skin blood flow, acetylcholinesterase inhibitor and, R951

- Sympathetic activity, autonomic hyperreflexia, chronic cervical spinal cord injury and, R169

## Sympathetic nerve

- activity, renal, captopril effects, R1417
- peripheral, activity, desipramine hydrochloride effects, R876

- renal  
ANP central administration and, R1250  
pentobarbital anesthesia effects, R616  
Sympathetic nervous system  
fasting effects, enhanced response to epinephrine, R87  
high body weight, brown fat composition and, R608  
Sympathetic outflow, baroreflex control, pregnancy, captopril effects, R1417
- T**
- Taste: *see* Gustatory response  
Temperature  
acclimation, phospholipid synthesis, hepatocytes (trout), R1495  
acid-base status and, hippocampal population spikes and (hamster), R1140  
Temperature, body  
bacterial peptidoglycan effects, R182  
circadian variation, during exercise, R836  
core, spontaneous hypertension, radiotelemetry measurement, R743  
gastrointestinal flora effects, R552  
prostaglandin E<sub>1</sub> fever, CSF pressure, awake state, R783  
regulation  
acetylcholinesterase inhibitor and, R951  
interleukin 6 and fever, R798  
osmosensitive hypothalamic neurons, R175  
pyrogen administration, exercise, R842  
spontaneous hypertension, R1064  
Tethering systems, blood pressure recording and (monkey), R1512  
Tetrodotoxin, GABAergic responses, hypertension, ventrolateral medulla, R450  
Theophylline  
bombesin inhibition of chloride secretion and, rectal gland (dogfish), R1459  
metabolism and, weanlings, R193  
urea transport, salt acclimation and, bladder (toad), R883  
Thermogenesis  
control of thyroxine deiodinase, obesity, brown fat, R430  
insulin regulation, uncoupling proteins, brown fat, R418  
nonshivering, cytochrome oxidase capacity and, brown fat (gerbil), R1291  
Weir equation, metabolic rate, R1347  
Thermoregulation  
behavioral, hematocrit effects (toad), R848  
brain cooling, facial vessel role in (camel), R602  
circadian variation, during exercise, R836  
glycolysis, pectoralis muscle (bird), R711  
high body weight, brown fat composition and, R608  
spontaneous hypertension and, R1064  
Thirst: *see* Drinking  
Thoracic duct, lymph flow, outflow pressure and vascular volume loading effects (sheep), R240  
Thyroid hormones  
adrenergic effects on, obesity, brown fat, R430  
cardiac isomyosin profile, metabolism effects, R346  
hypertension, skeletal muscle properties, R352  
transport, blood to brain, choroid plexus, R338  
Thyrotropin-releasing hormone, infusions, dorsal raphe nucleus, R1464  
Thyroxine, transport, blood to brain, choroid plexus, R338  
Thyroxine deiodinase, adrenergic effects on, obesity, brown fat, R430  
Tissue, fibrous, suspension effects, R725  
Training: *see* Exercise  
Transmural nerve, stimulation, brain cooling and (camel), R602  
Transthyretin, synthesis, thyroxine transport via, choroid plexus, R338  
TRH: *see* Thyrotropin-releasing hormone  
Tricyclic antidepressants, peripheral sympathetic nerve activity and, R876  
Trifluoperazine, stimulation of hydrogen ion secretion, urinary bladder (turtle), R222
